- Knee pockets can be adjusted so knee pads can be optimally placed on the knee
- Pleat in back with ventilation
- Leg length 32" | Size: C 44-C 66

PYROPRO®

PyroPro® is MASCOT's anti-static, acid-resistant and flame retardant fabric used in the MASCOT® Multisafe range of workwear. Proban® is used in the manufacture of PyroPro®. Meeting the standards of EN531 and EN533 you can be assured of high protection in certain dangerous environments with this modern, durable range of workwear. The range includes many clever design features to further increase your safety. For example, all seams face downwards so sparks cannot become lodged in the garment, and bellows sleeve closures are seen on the Ternitz Shirt.
